A Merry Christmas and A Happy New Year to all Our Readers

SCHOOL CHILDREN GIVE CONCERT

The first school concert held in Mirror took place at the Mirror theatre last Friday evening and was a great success in every way. It was well attended, the program given by the children was excellent and the proceeds totalled up to about \$140.00. For a first public appearance the performance of the children was beyond criticism, and it was quite evident that the teachers, Misses Squarbriggs and Beer had devoted considerable time and effort to the work of getting the children up to the standard and perform the way they did on Friday evening.

The drills were executed with precision and unison and the choruses were rendered in a pleasing manner. It was almost impossible to single out any particular item for special mention, although Miss Margaret McLean, organist, was particularly noteworthy.

THREE TRUSTEES TO BE ELECTED

"An annual meeting of the ratepayers of a consolidated school district shall be held at a central place within the district not later than the fifteenth day of January in each year commencing at thirty minutes after 1 o'clock in the afternoon, standard time, and the business hereat transacted as nearly as may be in accordance with the provisions of this Ordinance respecting annual meetings in village districts except as hereinafter provided."

"(2) Such meeting, as soon as the other business of the consolidated district has been transacted, or at three o'clock in the afternoon if the other business be not then completed, shall adjourn and the resident ratepayers of each district included in the consolidated district the term of office of whose trustee has expired or for which there is a vacancy to be filled shall then meet separately for the purpose of electing a trustee. The resident ratepayers present at the meeting of a district as aforesaid shall elect a chairman and secretary and the chairman shall immediately call for nominations for the office of trustee, and otherwise the provisions of this Ordinance with respect to the nominations and election of a trustee at the annual meeting in village district shall apply except that the declarations in form B or B b as provided in section 58 of this Ordinance; provided that in the case of a district containing a town the poll shall remain open for a period of four hours."

U. S. Must Share in Work of Aiding Austria

LONDON.—In his speech Thursday, Lloyd George referred to the assistance the allies were rendering Austria in food, coal and other supplies, which he described as a mere soup kitchen plan to mitigate a situation regarding large numbers.

"But," the Premier continued, "England alone already is severely handicapped, and cannot undertake the task of restoring the shattered world and I fail to see what can be done unless America comes frankly with us to take up her share."

Lloyd George defined the delay in connection with the peace treaty with Turkey on the ground of the necessity to know what the United States intended to do. France and Great Britain, he declared, already had heavy burdens, while the United States was under no great extraneous burdens and had her gigantic resources.

It would have been precipitate and led to misunderstanding and suspicions, Lloyd George said, had we not awaited America's decision. We are now entitled to say that we have waited up to the very minute we promised America, and there is no prospect of America coming in.

D'Annunzio Still at Fiume

Women Said to Be Implying Him to Remain in the City

Fiume.—The withdrawal from Fiume of Gabriele D'Annunzio and his troops, which was expected on Friday, did not take place, the women of the town having implied him to remain in his position there.

D'Annunzio announces that he will not leave Fiume until a plebiscite approves his departure.

A ship of commerce, Fiume has ordered a demonstration against his withdrawal.

Accident to Captain Alcock

Alcock Crashed Near Cotnam, in District of Seine Inférieure.

Normandy.

LONDON.—Captain Sir John Alcock, who made the first non-stop airplane flight across the Atlantic Ocean, has been seriously injured, according to a dispatch from Rouen. His plane crashed near Cotnam, in the department of Seine Inférieure, Normandy.

Four Thousand Saloons Close

Chicago.—Four thousand of Chicago's five thousand saloons will close their doors or go into other business on January 1, according to an estimate by J. M. McCarthy, secretary of the Illinois Liquor Dealers' Association. "We really expected to see the saloons open after the supreme court action," he said, and the decision upholding the prohibition took the pep out of the owners."

To Celebrate Gen. Wolfe's Birthday

LONDON.—The 193rd anniversary of Wolfe's birthday will be celebrated January 2 at Westbury, Kent, his birthplace, by the usual dinner.

Ge. George Perley, Canadian high commissioner, has accepted an invitation.

New Premier Endorsed By Ontario Farmers

Toronto.—Unanimously endorsing the election of Mr. Drury and his colleagues in the provincial cabinet, government representatives of the farmers in this province, the session of the U.F.O., held in Massey hall in connection with the annual convention, was one of the most enthusiastic meetings ever held in that commodious building.

A formal resolution to this effect was carried without a moment's hesitation, and when Premier Drury arose to express his thanks for this he was greeted with exceedingly hearty cheering.

"I thank you most sincerely," he said, "for your cordiality of confidence in myself and my colleagues. It is with a feeling of great humility as well as with recognition of the honor you have conferred upon me

Railway Schedule Will Stand

Companies Declared to Carry Out Scheme of Curtailment Previously Announced

Montreal.—It was stated by leading officials of the Grand Trunk and Canadian Pacific Railways that there was little present indication of any change with regard to the curtailment of train service on those lines owing to the coal shortage due to the bituminous coal strike in the United States. With one or two minor exceptions, it was said, the curtailment plans would be carried out as already announced. It is therefore apparent that reductions in the service announced by the two ways will continue until further notice, and certainly until the coal condition improves. It will depend on two factors, winter operating conditions and the ordinary coal supply.

It will not interfere immediately with holiday traffic, as many changes will not go into effect until after the New Year.

Millions are Starving

Hoover Says Immediate Help Must Be Sent Central Europe

Washington.—Starvation faces from fifteen to twenty million people in Central Europe, announced by none unless some means can be discovered for their assistance, Herbert Hoover, former food administrator, said in a formal statement. Unless relief is quickly furnished, the predicted a break down of stable government in the countries affected and creation of another cesspool like Russia.

To meet the situation, Mr. Hoover proposed that the "great surplus of wheat and flour" held by the grain corporation be sold on credit to Finland, Poland, Austria and other nations of Central Europe.

The grain corporation, he said, could extend credit grain without capital advance proposed without a cent of special appropriations by congressmen.

Handing Over the Spoils

Hunt's Big Effort to Comply With Conditions of Peace

LONDON.—Winston Spencer Churchill, secretary of the House of Commons, has handed over to the allies 5,000 guns, 25,000 machine guns, 1,000 trench mortars and 1,200 airplanes. They had still failed to deliver 42 locomotives and 4,500 rail cars. The secretary said that the Germans had made a tremendous effort to comply with the conditions imposed upon them.

Prince of Wales to Visit Australia

LONDON.—Announcement by the Prince of Wales that he is proceeding to Australia and New Zealand about March for six or seven months has excited great interest.

Comments on the announcement predict for him a great success and a reputation, to use his own words, of "a wonderful time in Canada."

Immediate Help for Austrians

Paris.—After further consideration of Austria's requirements for the relief of her distressing food conditions, the supreme council decided that it would be necessary to furnish relief to the amount of \$700,000 at least, to go forward at the rate of \$5,000 monthly.

Belief was expressed by the Austrian delegates that the total sum necessary would reach \$10,000,000, which is the amount Chancellor Renner asked the council to loan to Austria.

St. Catharines—Closing of all the public and private schools of the city has been ordered through the city board of education because of the absence of six cases of smallpox in the city. The board also asked the city council to put the Vaccination Act into force.

Manitoba May See Election in July

Winnipeg.—The next provincial general election would be held probably in July, but that no definite announcement would be made until after the election of the new premier was the statement of Premier Ross.

The new voters' list, he mentioned, would be practically double that on which the last election took place.

Want Limitation of Newspaper in U. S.

Bill Would Restrict Papers to Using Same Quantity as Last Year

Washington.—A new plan for restricting use of print paper was proposed in a bill introduced by Representative Hoch, Republican, Kansas. The Hoch bill would restrict all newspapers and periodicals from using more paper in the first six months of 1920 than was used in the first half of 1919. The restriction would take into consideration circulation and new publications.

Under the Hoch bill no publisher would be given second class mailing privileges without filing a pledge to observe the limitation, and violators would suffer the penalty of paying three times the usual rates.

Currency and Exchange

Austen Chamberlain Says Nations Must Solve Problem of Currencies

LONDON.—Austen Chamberlain, Chancellor of the Exchequer, in the course of a debate in the House of Commons on the question of currency and exchange, expressed the opinion that the problems could be solved by international effort, in which the largest share of the work necessarily must be done by nations possessing the largest means, not those who were in the war from the United States and neutral nations, who suffered much less than the belligerents.

The Chancellor said that those members of parliament who were of the opinion that the nations should be left to solve the problem, and he believed, under a course would promote the desired settlement.

Art Treasures For Security

Alles Take Fine Works as Security For Loan

Paris.—The art treasures of Austria—the famous Mona Lisa and other paintings and sculptures brought to France by Napoleon, will be taken as security by the French government for a loan of gold and coins, which will be used to finance the Austrian government. The French government, it is believed, will accept the art treasures as security for the loan, and the Austrian government will be required to return the art treasures to France when the loan is repaid.

Massacre Report Denied

Report Was Obviously Bolshevik Propaganda

LONDON.—Official denial of the report circulated by the Russian Bolsheviks that a massacre of British soldiers had taken place at Mesopotamia, was made by the War Office. The official statement stated that this report had been repeated to the War Office without comment by the officer commanding the Mesopotamian forces, and that the report was obviously Bolshevik propaganda intended to stir up trouble in the east, particularly in India.

Immediate Help for Austrians

Paris.—After further consideration of Austria's requirements for the relief of her distressing food conditions, the supreme council decided that it would be necessary to furnish relief to the amount of \$700,000 at least, to go forward at the rate of \$5,000 monthly.

Belief was expressed by the Austrian delegates that the total sum necessary would reach \$10,000,000, which is the amount Chancellor Renner asked the council to loan to Austria.

St. Catharines—Closing of all the public and private schools of the city has been ordered through the city board of education because of the absence of six cases of smallpox in the city. The board also asked the city council to put the Vaccination Act into force.

Manitoba May See Election in July

Winnipeg.—The next provincial general election would be held probably in July, but that no definite announcement would be made until after the election of the new premier was the statement of Premier Ross.

The new voters' list, he mentioned, would be practically double that on which the last election took place.

Canteen Profits in England and France

Lieut.-Col. Clerly Reaches Ottawa With \$150,000.00 as Canada's Share

Ottawa.—The Ottawa Journal says: "A real Christmas handout has arrived in Ottawa. He is Lieut.-Col. Clerly, of the pay and audit branch of the department of militia and defence, and he has brought back with him from England the sum of \$150,000.00, Canada's share of the profits of the canteens there. As all of the money received by these canteens came from the pockets of the soldiers in England and France, it is regarded as proper that the money should go back to the soldiers."

"A suggestion that the money should be turned over to be administered by the postmaster general was not found favor among the few soldiers in Ottawa who have knowledge of the money."

Artful Bank Robbery

Assembled Staff of Bank in a Room Locked and the Door

Aix La Chapelle.—A French soldier wearing the uniform of a captain of the Belgian army called upon the German chief of police here and demanded that he loan him three German policemen to search a local bank. His request was complied with, and the three policemen, who were ordered to the bank, found the bank empty. The soldier then entered the bank, and the manager in a room, the door of which was locked. After this he ordered the two other police to stand watch over the prisoners, and they directed also not to open the back and key. The soldier then entered the bank, and the manager in a room, the door of which was locked. After this he ordered the two other police to stand watch over the prisoners, and they directed also not to open the back and key.

THURSDAY, DEC. 25, 1919

Service At St. Monica's

Service will be held in St.
Monica's church, Mirror, on
Saturday afternoon, Dec. 28th, 19-
19, at 3 o'clock. Rev. Malcolm
Pearl, M. A., the new pastor,
will conduct the service. An
invitation is extended to every
one to attend.

R. Conway Gets Contract

The Mirror School Board held
a meeting last Saturday after-
noon with Chairman Biley and
Trustee Satter present. Two
tenders for handling the children
from the northern part of the
district were received, viz.: J.
R. Brackney, at \$5.00; and R.
Conway, at \$5.00 per day. The
latter was accepted. About 15
applications for the position of
principal were received and
these have been cut down to
three. The Board will endeavor
to get a married man to take
charge of the school.

VETERAN'S DANCE NEW YEAR'S EVE

The dance to be given by the
Mirror G.W.V.A. on New Year's
Eve promises to be one of the
best yet, and will outdo the one
held in November last. Good
music will be furnished by the
Wentworth orchestra, of Bas-
shaw. Two prizes amounting
to \$25.00 will be given to a lady
and gentleman holding the
lucky numbers. Each gentle-
man gets a number when he
buys a ticket, and every lady in
attendance the night of the
dance will secure a number;
two numbers will be drawn on
the night of the dance. The
prize in each case will consist
of an order for \$12.50 on any of
the following business places in
Mirror, viz.: Spice & Son, C.
L. Suggitt, Geo. Thomas, J. F.
Flewelling, J. C. McNair &
Co., McCormack Lbr. Co., J.
Common, Thomas & Co., G. M.
Jones, Mirror Garage, R. Paton
and Watson Bros.

Audley Ray as auctioneer, will
sell the baskets, and any per-
son paying \$2.00 or more for a
basket will receive a refund of
\$1.00. After the stroke of
twelve and in the year 1920,
the dance will be a leap year
one and a nominal fine will
probably be imposed on any
number of the male species
who asks a member of the op-
posite sex for a dance. Every
body turn out and help boost
the dance, and incidentally the
Mirror branch of the Great War
Veteran's Association.

W. L. McNair, assisting in the
store of J. C. McNair & Co., for
a few weeks. Mr. McNair has
only recently been discharged
from the military hospital at
Wetaskiwin and is a 49th Batta-
lion.

LOCAL AND PERSONAL NEWS

Clayton Kehue was laid up
for a few days with quinsy.

Mrs. Jns. MacKirdy went to
Calgary on Monday last. Mr.
MacKirdy is still a patient in
the military hospital.

Miss Doris Brewster is home
from the high school at Edmon-
ton for the Christmas and New
Year's festivities.

In reporting the marriage of
Mr. and Mrs. J. Clarke last
week, we should have stated
that the guests were Mr. and
Mrs. T. Sparks, the former be-
ing a brother of the bride's.
We regret the error.

J. B. WATSON, Mirror

G. W. V. A. dance in the Mir-
ror theatre on New Year's Eve.
Paste the date in your hat.

We are very curious as to the
reason for R. M. Pym's period-
ical trips to Lethbridge. He
was there for a day this week.

Stuart Quickhank & Co., of
Alta, are loading a car of wheat
over the platform here.

Miss Sharpe has accepted an
engagement with the Private
Peat Canadian Lyceum Bureau
and left on Monday to take up
her work. Miss Millie McLeod
is "hello girl" in the meantime.

We extend a welcome to Rev.
Malcolm and Mrs. Pearl, and
three children, who arrived in
Mirror on Tuesday afternoon
from England.

Ray Pearl will be in charge
of the Mirror, Bashaw, and Alta
Clubs, and Fountainstown Mis-
sions.

Methodist Church

Service every Sunday even-
ing at 7.30 o'clock. Sunday
School at 11 a.m. Prayer meet-
ing every Wednesday evening
at 8.00 o'clock. Rev. G. L.
Backus will take the service on
Sunday next. All are welcome
to these services.

Much Grain Loaded Here

A great deal of grain is being
shipped through the Security
Elevator at Mirror and this will
be one of the best years the Coy.
has ever had at this point.

Farmers are hauling grain
from twenty-five mile away,
and from every direction. The
embargo placed on the shipment
of grain has filled the elevators
in the neighboring towns.
Cars which are unloaded can
only be loaded at the same point
and as considerable coal is con-
signed to Mirror for railway and
other purposes, Mirror is in a
position to ship out all the grain
that comes in. The merchants
are feeling a difference in the
number of traders and noticeable
increase in business. Another
elevator in Mirror might be the
means of retaining the bulk of
this trade.

Banquet Times:—Every once
in a while some cheerful individ-
ual remarks to us: Well, now
that the paper is out, I suppose
you can take it easy for three
or four days. Yes, how deligh-
ful it is that a country editor
has nothing to do between press
days. Business runs along au-
tomatically. When paper bills
come due, money drops off the
trees with which to pay them.
Subscribers vie with other to see
who pays the farthest advance.

Advertisers beg for additional
space. And the way the news
hunts up the editor is also plea-
sant to contemplate. There is

something strange about the
way the news items act. When
the paper is out the editor simply
goes back to his easy chair and
looks wise and waits for next
week's press day. The day be-
fore press day the people line up
in front of the office door and
they file past the desk and tell
him all the news of the week.
He writes it up in fifteen or
twenty minutes, takes it back
and hangs it on a hook. The
compositors take the copy and
shake it over the type cases, say
a few mystic words, the type
flies into place, and after a few
passes by the foreman the
forms are ready for the press
again. And the editor goes
down and deposits some more
in the bank. It is the greatest
snip in the catalogue. Now, if
the editor could only do away
with the press day his job
would be complete.

An Unprofitable Railway Service

As a session of the board of railway commissioners held in Winnipeg recently, W. B. Carvell, said there was no certainty of profitable railway service in Canada unless some adjustments were made between expenditures and revenue. The railways were in a position to be a constant drain on the treasury.

Mr. Carvell added: "In view of the fact that the cost of operating railroads was more than doubled in the last two and a half years, and that the expense of the railways has increased by \$60,000,000, the people of Canada may as well realize that they cannot have excessive railway accommodations such as the railways do on two trains a day, unless they are prepared to pay for it."

Hearing was given to the Grain Growers in the matter of proposals to increase telegraph rates, to which the Winnipeg dealers contribute many thousands a year, the secretary of one association saying that as the people of the world are changing their attitude towards the sacredness of capital and that there are individuals entitled to more consideration than capital. The item put forward by the companies for depreciation were also characterized as being a "joke," by the Grain Growers' representative.

Mr. Carvell replied that he had personal knowledge of places which were now paying the penalty because they had not set aside a large enough depreciation fund in the earlier days of their history.

He said, however, that the board invited the fullest evidence regarding the application, and everyone would be given a reasonable opportunity of testimony in line to present objections.

What's Your Trade Mark?

Thinking That "Jingalingus" Gives us Station in Life

We are all marked with our own. We are all marked with our own. We are all marked with our own. We are all marked with our own.

I once heard an interesting story of a man who, being unable to read, asked the chauffeur, "By his suit, by the face that he will probably be a woman with several children from the car steps. And he was the man expected."

It is an air of omniscience about some people that one instantly feels. It seems too compact to be analyzed. Daily we are adding to the thing that makes us apart from the rest, more and more emphasizing our trade mark. So that it is well for us to get out what it is that is making us wanted around or not. For it is the thing that most distinguishes us that gives us our station in life. And it is the only thing that we are able to prove when we are gone, to bless our memory.

The Mechanical "Katie"

Invention of Engineer, By Which He Makes Water Talk

"Katie" one of the most wonderful inventions exhibited at the recent shipping engineering exhibition in London, is likely to prove the most valuable to sea men in many years since the discovery of "Katie" is the machine given to the invention of an engineer, by which he makes water talk.

It is an automatic boat, with a sensitive depth-finding mechanism connected telephonically, and in placed on the surface of the water. Another delicate instrument rests on the bottom with a wire connection. When an engineer wants to know the depth of water at a particular spot he rings up "Katie" on the phone and she tells him the exact depth.

She speaks in soft, jolly buzzes in the manner of the Morse code, and when she gets out of her depth she stutters. If the current is too strong she becomes speechless. "Katie" will also warn a captain how much water has got into the hold or the engine-room after a collision.

A woman never really knows what she thinks of a man until she gets a divorce from him.

About Japan

Old Paris Concerning Its Inhabitants and Customs

Inscriptions on a workman's cap or hand, stating the occupation and name of employer, are said to be customary in many parts of Japan.

The Japanese are very much alike physically. Recent measurements taken in Japan show that there is no variation, except a couple of inches in height or 20 lbs. in weight.

The Japanese are expensive gardeners. They give such individual attention to each blossom that wonderful results are obtained. Native flowers are the favorite.

They give such individual attention to each blossom that wonderful results are obtained. Native flowers are the favorite.

Seven months a year is said to be devoted to making a new suit in Japan—that is, pay for board and lodging—and how many have been known to manage on \$3 a year.

A Japanese woman, with a most notable affair. The purchaser do not call on their bids or not, but they write their names, together with the price, on a slip of paper.

They write their names, together with the price, on a slip of paper. They write their names, together with the price, on a slip of paper.

The Japanese festivals number five each year. They are easily remembered. First of first month, New Year.

Second of third month, Feast of Dolls for girls; fifth of fifth month, Feast of Dolls for boys; 7th of seventh month, the Day for the God and Goddess of Love; 9th of ninth month, Feast of Chrysanthemums—Ancestors.

Discouraging Burglars

Rewards for Capture, Dead or Alive, Has Been Offered by the Government of the Province of Chongking.

The epidemic of bank burglaries and daylight holdups has moved the citizens of Northfield, Minn., to issue rewards for the capture of the bandits.

It has been a most conspicuous place: Crooks. Take Notice: \$300 reward. For the capture of the bandits.

Run Baby-Killer Escapes on Technically

Bombshell Is Thrown on Work Done By British Secret Service

The story of the arrest, imprisonment and final release of Captain Kiserewetter, the commander of the submarine which sunk the hospital ship *Glennistown*, discloses a wide difference of opinion between British government officials as to what rights the perpetrators of wanton war crimes should be given.

The government legal department held that England had the right to detain Kiserewetter during the life of the armistice, while the admiralty officers believed that they had the right to arrest such offenders any time and hold them for trial after peace was declared.

After the signing of the armistice Kiserewetter went to Spain, where he obtained passports for his return to Germany.

Canadians Will Explore Jungles

Son of Saskatchewan Pioneer Is With Expedition for the Malay Archipelago

In search of apes and a tribe of jungle dwarfs, Carvell Wells and Marshall McIvor leave Canada shortly for the jungles of the Malay Archipelago.

Darwin tells us that we all come from apes, and it is a wonderful fact that there exists today in the Malay jungles a tribe of dwarfs called Semang, who in many respects are not so far removed as the orang-utans of Borneo that immemorial ape with long red hair.

The missing link no longer is a mystery. It is a fact that the Semang, a primitive intermediate between the ape and man, known as the Pithecanthropus Erectus, has actually been discovered in the jungles of Malay.

Introduction of New Hullless Oat

Water Power in Prairie Provinces

Manitoba Leads With More Than Three Million Horse-Power

An estimate of the extent of available water-power in the three Prairie Provinces has been made by officers of the Department of the Interior, and the result is 4,000,000 horse-power.

Manitoba leads with more than three millions, and the other two provinces have a little less than half a million each. Of all this power only 114,815 horse-power are developed, the largest being at Winnipeg.

In the production of power the Nelson River leads with almost two and a half million horse-power.

Many of these undeveloped water-powers are known to exist in the Northwest, those of the Nelson River, of the Churchill, of the Slave and of the Athabasca. Promising mineral deposits are known to exist in the Northwest, and for their development power will be required. The "white coal" of the waterfalls will produce the electricity that mining development will call for.

Several large and never failing water-powers are now being developed, and are capable of supplying the needs of populations many times larger than those now on the spot. For instance, the Winnipeg River now producing 81,320 horsepower, can furnish power sufficient to supply the needs of the industries of a population of three millions. The only developed river in Alberta is the Bow, which at a point near Calgary furnishes 42,000 horse-power. If all the power along the course of the Bow was developed it would supply the needs of three hundred thousand people.

Several large and never failing water-powers are now being developed, and are capable of supplying the needs of populations many times larger than those now on the spot. For instance, the Winnipeg River now producing 81,320 horsepower, can furnish power sufficient to supply the needs of the industries of a population of three millions. The only developed river in Alberta is the Bow, which at a point near Calgary furnishes 42,000 horse-power. If all the power along the course of the Bow was developed it would supply the needs of three hundred thousand people.

A GREAT STOMACH BRACER

Makes You Feel Lively and Young—Removes That Tired Feeling That Tires You

At some period in our lives there is a time when the stomach is "off"—not working well. It is a common complaint, and it is a very annoying one. It is a condition that can be cured by the use of Dr. Hamilton's Pills. These pills are a great stomach bracer. They make you feel lively and young. They remove that tired feeling that tires you. They are a great stomach bracer. They make you feel lively and young. They remove that tired feeling that tires you.

Certainly the world affords no better medicine for the stomach than Dr. Hamilton's Pills of Mandrake and Butternut. Their laxative effect is ideal—can't be beaten. In addition to their helpful action upon the bowels, these pills contain certain ingredients that strengthen and invigorate the muscles of the stomach, thereby relieving all sorts of stomach misery, indigestion, sourness, flatulency, gas, headache and biliousness.

You try Dr. Hamilton's Pills—they'll make you feel full of energy—brimming over with snap; they bring and maintain robustness, vigor, health, and isn't that just what you've looked for in your medicine?

USE A SUBSTITUTE FOR DR. HAMILTON'S PILLS. 25c per box, all dealers.

Children Suffer

For Want of Milk

Exporting Dairy Supplies at Expense of Home Market

The following statement has been issued by the board of commerce commissioners at Winnipeg:

"Thousands of children in Canada are being starved for want of milk. Inevitably of the poorer classes are the victims. The human asset is being depleted and, in fact, in poorer countries is being starved."

In order that the children of Canada be properly fed, butter, cheese and condensed milk demand to be taken advantage of to make as much money as possible for the Canadian producer and trader. The milk that should nourish the Canadian infant and weakling is being shipped out to the foreign market, etc. Even the butter is not allowed to stay here it can be sold abroad. The policy of the government is to encourage this thoughtless procedure. Every department of agriculture in Canada, both Dominion and provincial is busy reporting on the week the high prices that Canadian producers will demand abroad. And, as a result of this, the Canadian government is encouraging this export to the detriment of the preservation of the human asset.

"The question of milk production and distribution has been before the board of commerce from various cities in the Dominion. The board's observations lead it to make statements in the matter. Unless there is a change of policy, and milk and milk products are made plentiful and brought within the reach of the poorest people there is bound to be a heavy infant mortality and a general depreciation of the physical condition of the Canadian population. This can never be made up in the more dollars and cents brought into the country by the present export trade policies. This board asks the people of Canada to consider whether we should let children starve merely because the Canadian dollars may make more dollars. There is a further consideration to be taken to heart. Most privileged people have ice cream and luxury milk products while the children of others are starved for the want of the milk which that nation intended they should have."

Many Men Needed in Bush

The land and timber contractors say there is a large shortage of bushmen this winter. They say that one thousand men is needed for the season. It is available at once. Working conditions are ideal for bushmen. The wages are high. The work is not too hard. The men are needed for the season. The wages are high. The work is not too hard. The men are needed for the season.

Edward J. Gardner of the Height of Land, Ontario, B.I.H. has completed a villa, with everything in it of his own manufacture. A few years ago Mr. Gardner made the smallest perfect jack-knife in the world, the whole thing, wide open, measuring less than three-eighths of an inch in length.

Wise is the orator who knows when to cut a long story short.

MURINE Cures, Refreshes, Soothes, Heals, and Relieves. It is a great remedy for all sorts of skin diseases. It is a great remedy for all sorts of skin diseases. It is a great remedy for all sorts of skin diseases. It is a great remedy for all sorts of skin diseases. It is a great remedy for all sorts of skin diseases.

Alberta Cattle Again Successful

Rancher Has Created a New Record For Western Canada

Capturing the first prize in the international stock show at Chicago, also being championable and record grand champion with his heifer "Lavender 4th," Chas. G. Beeching, a well-known rancher and breeder, has created a new record for Western Canada. These prizes were won in open competition with more than four hundred and fifty exhibitors, the shorthorn showing being especially strong.

Mr. Beeching purchased the heifer some weeks ago at the Brandon Stock Show, from a prominent Manitoba breeder. Immediately after the purchase, the price of which was \$5,000, he was offered a big sum for the animal from a prominent American breeder, but refused to sell, saying he was determined to bring the heifer to the international stock show at Chicago. For what he has already achieved credit is to a considerable extent due to the "provincial department of agriculture," which has been very helpful in the matter.

Mr. Beeching has been very successful in his breeding. He has a number of other prize-winning animals. He is a very successful breeder. He is a very successful breeder. He is a very successful breeder. He is a very successful breeder. He is a very successful breeder.

The Democratic Prince

Heretofore His is a Name to Conjure With in Canada

After his long visit to complete the epic distance of the Dominion from ocean to ocean, and the short visit to our neighbors and friends across the boundary, the Prince has sailed away from Halifax for England again. In the face of his comrades-in-arms and of his father's, royal Canadian subjects, there is a halo of romance in that sailing as truly as though he were a prince of the olden time making the voyage in a wooden ship driven by Atlantic winds. For the Prince captured the hearts and imaginations of his subjects, and he is a name to conjure with in Canada which he has justly mentioned and practically achieved. He is a name to conjure with in Canada which he has justly mentioned and practically achieved. He is a name to conjure with in Canada which he has justly mentioned and practically achieved.

The Prince has sailed away. . . . May he come again soon, if not officially, but in the name of the U. S. or his plain play under the shadow of the Rockies yonder. Prince and rancher and man, he has the deep-seated affection of the Canadian people—Manitoba Free Press.

An Indication of Prosperity

One Person in Every Twelve Owns An Automobile In Saskatchewan

When a province with a population of about 750,000 has almost 50,000 automobiles in use, or an average of one to every twelve persons, it is fairly obvious that that province is enjoying a reasonable amount of prosperity. This, in a community where the majority of its population is dependent on the products of the land, means agricultural prosperity.

This year, 1919, Saskatchewan licensees have been taken out in the province of Saskatchewan, or approximately 8,000 more than were issued in 1918, according to figures issued by the motor license department of the Saskatchewan government. These figures may be taken as representative of the whole year, as no further 1919 license will be issued after the middle of this month.

Nine hundred and ninety-seven driving tools alone are required in manufacturing a modern rifle. The twist drill is one of the basest of these. To supply 1,000,000 rifles, 900,000 holes must be drilled.

"It is healthier to be craniated," says an English physician. Maybe so, but for our part we know we should never be the same man again.

Dairy Production in Every Alberta

Province of Alberta Exhibit a First

During 1918 Alberta stood third among the provinces of the Dominion in the amount of creamery butter manufactured and marketed. (Oxybutyric acid) and creamery butter passed to this activity. Manitoba, a much older settled province than our own, followed, coming quite close to Alberta's record.

For a fairly western province to have achieved this enviable record in so short a time is cause for congratulation. One special reason for the fact showing we are making head in the fact that, climatically, we are especially favored for this particular business. There is no province in the whole Dominion where natural dairying advantages are so numerous, or where the business offers such splendid rewards for minimum effort of an intelligent sort.

For what we have already achieved credit is to a considerable extent due to the "provincial department of agriculture," which has been very helpful in the matter. The creamery business, and it is still continuing that aid. Last year we obtained more than four millions for our creamery butter industry. With a continuance of intelligent dairying and the accessions to the ranks of our creamery buttermakers, it is not difficult to see that this business should not be long before this income is doubled and trebled.

There is practically no limit to the possibilities of the industry in Alberta, when the export trade is taken into account.

As for our butter record so high there is no good reason why we should not stand close to the leaders in cheese production, which is another dairying industry immensely profitable. We have some cheese factories in this province, and their product is good in quality and quantity. It is produced in Ontario or Quebec, which two provinces manufacture 97 per cent of the Canadian factory-made cheese.

The Prince and Letitia passed on the other side because the man had been robbed already." "A schoolmaster is called a pedagogue." "Fifteen means a list of your descendants."

The "Canadian Importer" now under construction at False Creek, B.C., will, in addition to the "Canadian Railway" be put into service within a few months. It will be a service under the flag of the Canadian merchant marine. Both vessels will be fitted out with refrigerating plants to compete in the frozen meat industry.

Of the twenty odd million acres which comprise Ireland, nearly seven-sevenths are barren, being mountain, turf, bog or marsh.

It's simply impossible for one man to love two women at the same time after they are of one flesh and one.

HOLY GEE, MY HEAD FEELS GOOD TO-DAY!

Pain Under Eyes Is Gone Headache Cured, Catarrh Relieved!

This is the Common Experience of Those Who Truly Use the Vapor of Catarrhazone

Remember this, Catarrh can never be cured by any other means. It is a disease of the mucous membranes, and it is a disease of the mucous membranes. It is a disease of the mucous membranes. It is a disease of the mucous membranes. It is a disease of the mucous membranes.

Nothing gives a woman's religion such a jolt as the suggestion that she got the brain heaven really intended for.

Every Alberta Exhibit a First

Spectacular Success at International Stock Show at Chicago

"Every exhibit from Alberta carried off a first," remarked G. H. Hinton, secretary of the Alberta stock show, in the C.P.R. department of natural resources, on his return from the International Stock Show at Chicago. "The addition to the spectacular success of Hon. Duncan Marshall and Mr. Beeching, J. B. Lucas, of Calgary, Alberta, showed first in oats at the grain show with a very fine sample."

The general quality of the exhibit was well above the average, and there was a remarkably large number of entries. In cattle in ear lots there were 1,000 entries of extra fine cattle. The competitions were strong in all classes, and to win anything at all was a great honor. Even the horse exhibits were strong this year."

At the International Hay and Grain Show held in conjunction with the stock show, Saskatchewan made a clean sweep in spring feed, not less than 25 prizes, including the first prize. Saskatchewan exhibitors were almost equally successful in the oat competition, carrying away with them six awards.

Wireless Telephony

Can Now Be Practiced from an Airship up to a Distance of

The wonders of the new wireless telephony were demonstrated the other day at the houses of parliament in London. At a distance of 100 miles they were able to converse with the observers of airplanes flying at a height of 10,000 feet. There was also a conversation with a wireless telephone station some 20 miles away.

There are many evidences of increase in the population. Immigration is not yet large, shows a substantial increase over last year (1918), while the figures are small compared to pre-war years.

There are many evidences of increase in the population. Immigration is not yet large, shows a substantial increase over last year (1918), while the figures are small compared to pre-war years.

There are many evidences of increase in the population. Immigration is not yet large, shows a substantial increase over last year (1918), while the figures are small compared to pre-war years.

This demonstration was incidentally the occasion of a secret of the war being disclosed. Wireless telephony was made possible early in 1917 when the government was trying to keep the Royal Flying Corps. By 1917 sufficient progress had been made for the system to be of practical use.

In 1918, two sounders were fitted to the western front were fitted with wireless telephony, and the fact became known to the German High Command. They were long receivers, and not knowing to what was the new invention might be put, they decided to send a wireless message.

Unfortunately the retreat in March, 1918, broke up the organization, and by the time the wireless practice was resumed more had been done. But so far as is known nothing in connection with wireless telephony and been developed by the Germans, and it is impossible to estimate the advantage of our being so well ahead of the enemy.

In the course of the demonstration it was shown how an airship or a big airplane can determine its position from signals received from high-power wireless stations up to 700 miles. A new telephone set also exhibited, in which the transmitter, instead of being held to the speaker, is pressed against the neck of the speaker and records the vibrations of the sinistral instead of those of the air.

The sequel to the above-named incidents is interesting. Six officers took flight with the airship, the General, Sirley, at the House of Commons. It was explained that the airship had been flying round London within a radius of about 30 miles, at heights up to 15,000 feet.

Spoons of standard sizes, which are so familiar to us, have not been long in general use. The teaspoon, for example, is of comparatively recent introduction, for its use itself came in the eighteenth century. Spoons and after-dinner coffee spoons are also modern inventions.

Nothing gives a woman's religion such a jolt as the suggestion that she got the brain heaven really intended for.

Crop and Trade Conditions Throughout the Dominion

Complete Reports Submitted on Conditions in the Various Provinces of the Dominion at Annual Meeting of the Bank of Montreal Will Be of Special Interest to Mercantile and Farming Communities.

At the annual meeting of the Bank of Montreal with complete reports were submitted by the Superintendent of the Bank, dealing with trade and farming conditions in the various provinces of the Dominion. These reports cover the particular operations carried out in the various sections of the country, and on this account become of very special interest to the mercantile and farming communities desirous of keeping in touch with the important developments that are occurring throughout Canada. We quote from the different reports as follows:

Prairies Provinces
During part of the past season extensive areas in Saskatchewan and Alberta experienced, in common with the Northwestern States, severe drought and loss of crops, but owing to good yields in other areas and to the fact that the value of grain raised exceeded that of the year 1915, the largest crops in the history of the West was produced.

Failure of pasture and hay in certain districts caused anxiety to ranchers, and while autumn rains have helped to bring about a better price of feed for winter feed, the sale of some unfinished cattle has been a heavy and profitable business in the United States. The Government has encouraged sheep ranchers to pay prevailing prices for winter feed and carry over heavy and profitable yields from irrigated lands are giving a stimulus to irrigation which is ready to stabilize the livestock industry in the West.

Most important natural asset of Alberta and Saskatchewan, expected at Westminster was developed in quantity equal to that of the year 1915, and has been reduced to the point of being a serious problem.

Some progress has been made in the development of the oil fields. The Government has been able to develop new power at the Winnipeg River. The Government has been able to develop new power at the Winnipeg River.

There are many evidences of increase in the population. Immigration is not yet large, shows a substantial increase over last year (1918), while the figures are small compared to pre-war years.
